

Mikhail Semenov

AI Product Manager · Voice AI Agents · LLM · B2B SaaS

Perm, Russia (GMT+5) · Remote · Open to relocation (Cyprus, EU, UAE)

SUMMARY

Product manager with an engineering background. Launched Zvonobot AI, a B2B voice AI agent platform, and took it from zero to roughly 10% of group revenue in under a year. Run discovery, unit economics, pricing and go-to-market; prototype with AI coding agents in days. Open to full-time or contract work; can start within 2-4 weeks.

NUMBERS

- **~10%** of group revenue share held by the line I launched from zero in under a year.
- **~80** paying B2B customers repeat payments account for 30% of the line revenue.
- **500,000+** minutes of conversation handled by the voice AI agents in production.
- **+30%** average customer spend growth in average spend after the AI plans launched.

EXPERIENCE

Product Manager, Zvonobot (Prof-IT Group)

Feb 2022 - Present

Zvonobot is a B2B call automation service: voice bots and AI agents for lead generation, sales outreach and customer reactivation.

Zvonobot AI (fall 2025 - present)

- Launched Zvonobot AI, the voice AI agent line, from scratch: went to market on a white-label platform in weeks, proved demand with live customers, and made the case to build an in-house platform.
- By August 2026: about 80 paying business customers, roughly 10% of group revenue, 500,000+ minutes of live conversations in production; 30% of revenue comes from repeat payments.
- AI agents consistently outperform legacy robocalls on conversion to the target action on warm lead lists; average customer spend grew 30% after the launch of AI plans.
- Built the AI product suite: agent and script builder, LLM call analytics, per-second billing plans (LLM, ASR, TTS stack).

- Run go-to-market with a team of 4 engineers and a sales team that grew from 4 to 15 people to support the line; own pricing and per-call-type margins.

Core platform (2022-2025)

- Ran the core outbound-calling platform: customer console, call script builder, outbound campaigns, telephony, per-second billing, wallets, call analytics.
- Launched a virtual PBX as a complementary product to improve customer retention.
- Built the customer discovery process: interviews, metric-driven prioritization, a release cycle run jointly with sales and support.
- Introduced LLM tooling across company workflows; built a voice bot MVP on the OpenAI Realtime API in 2 days and an internal database tool in 4 days.

iOS / Frontend Developer, Fodoj UG (Germany)

Nov 2020 - Jan 2022

- Built the web app UI for the EU market: Spanish localization, reporting and compliance, usability testing.

PRODUCTS

Zvonobot AI

A B2B voice AI agent platform: agent builder, campaigns, telephony, per-second billing.

Proves a line taken from zero to roughly 10% of group revenue in under a year.

Case study (rebsem.ru/projects/zvonobot-ai-en/)

cursivo

An AI CRM for car rental, live in production: reads client documents, scores deal risk, suggests the next step.

Proves I take a product to live users outside the day job.

Case study (rebsem.ru/projects/cursivo-en/) Live (<https://cursivo.xyz>)

obrabot

An internal voice AI analytics console: an LLM segments calls and surfaces what needs human attention.

Proves LLM analytics built on top of real production data.

Case study (rebsem.ru/projects/obrabot-en/)

pet projects

Side projects built personally with AI coding agents (Claude Code, Codex) in 1-7 days from idea to a working release.

Proves hypothesis-validation speed and a shared language with engineers.

GitHub (<https://github.com/RebSem>)

SKILLS

ROLES

Product Manager, Product Owner

PRODUCT

product strategy and roadmap, discovery, customer interviews, metrics and product analytics, unit economics, pricing, A/B experiments, go-to-market, B2B SaaS, CRM

AI AND LLM

voice AI agents, conversational AI, LLM orchestration, prompt engineering, RAG, LLM evals, ASR, TTS, contact centers, SIP telephony

DELIVERY

spec, review, release cycle, working with engineers and sales, prototyping with AI coding agents (Claude Code, Codex), fast hypothesis validation, 0 to 1

TECHNICAL

SQL, Python, TypeScript, REST, integrations, telephony

EDUCATION, LANGUAGES, FORMAT

EDUCATION

Diploma, Perm State University, 2022.

LANGUAGES

Russian: native. English: working proficiency (B1+), daily written use.

WORK FORMAT

Remote from Perm (GMT+5), open to relocation (Cyprus, EU, UAE), available for business travel. Full-time or contract, can start within 2-4 weeks.

WHERE I AM A WEAKER FIT

So we do not waste each other's time, here is where I am not the best pick:

- Pure research ML or data science with no product layer on top.
- A single step in a long approval chain with no ownership over the problem.
- Products that add AI as a checkbox rather than for a real business job.
- Roles needing C-level live negotiation in English (written and async are comfortable).
