

SUMMARY

AI Product Manager who owns products end to end. I launched and run Zvonobot AI, a B2B voice AI-agent platform, from first hypothesis to a standalone revenue product.

500,000+

minutes of live customer conversations in 2026

+40%

conversion vs the legacy IVR robots

+30%

service average check after launch

EXPERIENCE

Product Manager, Voice AI platform

Feb 2022 - present

Zvonobot / Prof-IT · Perm

- **Launched 0 to 1:** validated the hypothesis on live clients (AI agents beat IVR robots by 40% on target action), then built the platform.
- **500,000+ minutes** of live conversations in 2026; the launch raised the service average check 30%.
- **Own discovery, roadmap and priorities,** defended to leadership in revenue and unit economics.
- **Shipped the full product with engineering:** console, agent and script builder, campaigns, telephony, per-second billing, wallets and call analytics on an LLM/ASR/TTS stack.
- **Built pricing and margin control** per call type; run releases and go-to-market with sales and support.

AI transformation, internal products

2022 - present

Prof-IT

- First to bring LLM tooling into the company's workflows; other teams now come to me for AI automation.
- Prototype with AI coding agents in days: voice-bot MVP on the OpenAI Realtime API in 2 days, internal database tool in 4.

iOS / UI Developer

Nov 2020 - Jan 2022

Fodoj UG, Germany

- Built web-app UI for the EU market: Spanish localization, reporting and compliance; UX tests with users.

PROJECTS

Zvonobot AI flagship voice AI-agent platform for B2B, in production. rebsem.ru/projects

cursivo AI CRM for car rental: reads documents, scores deal risk. cursivo.xyz
